# SUDOKU

## HOW TO PLAY SUDOKU

**OBJECTIVE:** Fill a 9x9 grid so that each column, each row, and each of the nine 3x3 boxes (also called blocks or regions) contains the digits from 1 to 9.

A cell is the smallest block in the game. Rows, columns, and regions each consist of 9 cells, and the whole game consists of 81 cells. A region has thicker lines surrounding it.

The most basic strategy to find missing numbers is scanning and it consists of:

1) Crosshatching - Scan rows and columns to eliminate where a specific number can be in a given region.

2) Counting - Simply count all the different numbers in a row, column, and region that connect to one cell. If there is just one number missing, then that's what should be in the cell.

4				9	3			6
1							2	4
2		3			4		8	5
8		9				7		
		6	3	7	1			
			8	2		5	6	3
	1		6		8		5	
	5					8	3	
	7		1		2	6		

	5				6	2		
2	8		5			9		4
	7		3		2	8	5	1
7		8		1		3	2	
	4		2				7	
			6	3			1	
			8					5
9		5				6		3
		6	1		9			

## HINTS:

Until you've had lots of practice figuring out puzzles, here are some questions that you can ask as you play to help you to make progress:

- Where could I place the value X in this row/column/box? (Go through the numbers 1 to 9, and scan to see if the number is already in that row / column / box)
- What value could I put in this cell? (If there's just one acceptable – put it in!)
- What row / column / box is nearly full, and can I fill it?
